Professional Summary

MERN Stack Developer with 1.5+ years of professional experience at Capgemini, skilled in JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, HTML5, CSS3, and Tailwind CSS. Experienced in building responsive web applications, reusable React components, RESTful APIs, authentication, database integration, debugging, and full-stack application development. Solved 265+ LeetCode problems.

Skills

Languages: JavaScript, Python, SQL

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design, React Router

Backend: Node.js, Express.js, REST APIs, API Integration

Database: MongoDB, MongoDB Atlas, MySQL

Developer Tools: Git, GitHub, VS Code, Vite, Postman

Full Stack: MERN Stack, Authentication, JWT, CRUD Operations, Client-Server Architecture

Technical Subjects: Data Structures and Algorithms, DBMS, OOPS, Web Application Architecture

Experience

Capgemini

Dec 2024 - May 2026

Analyst | MERN Stack Developer

Pune, India

- Developed and enhanced web application features using JavaScript, React.js, HTML5, CSS3, and REST APIs, building responsive interfaces and reusable React components.
- Built reusable React.js components and implemented client-side functionality using JavaScript, React Router, and API integration to support dynamic and responsive web applications.
- Developed and integrated backend services using Node.js and Express.js, implementing RESTful APIs and enabling seamless communication between frontend applications and backend services.
- Worked with SQL databases and optimized queries to support data-driven web applications, application functionality, and reliable backend data operations.
- Performed API testing, debugging, defect resolution, and application troubleshooting while collaborating with cross-functional teams to improve application reliability and performance.
- Applied full-stack development concepts including frontend development, backend development, REST API integration, database operations, debugging, testing, and responsive web application development.

Projects

SmartCart – AI-Powered E-Commerce Platform

Tech Stack: React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS, JWT, Google Gemini AI

- Developed a full-stack AI-powered e-commerce platform using React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, and REST APIs.
- Built responsive product listing, product details, cart, wishlist, checkout, authentication, and order management features using reusable React components and React Router.
- Implemented JWT-based authentication, session management, and user-specific cart functionality, with RESTful APIs for products, users, cart, wishlist, orders, and authentication.
- Integrated MongoDB Atlas for persistent data storage and Google Gemini to build an AI shopping assistant that analyzes natural-language queries and generates personalized product recommendations.
- Designed a responsive user interface with Tailwind CSS and deployed the frontend on Vercel and backend services on Render for production accessibility.

Coding Profile

LeetCode: Solved 290+ problems (222 Easy, 68 Medium, 3 Hard) 

Maximum Rating: 1476

Education

Lakshmi Narain College of Technology & Science, Bhopal

June 2020 - June 2024

Bachelor of Technology in Computer Science and Engineering (AI & ML)

CGPA: 8.89/10
